TECH

Bestway's R&D department has invested time, money and dedication to pinpoint how to make a comfortable and durable airbed. We've worked hard to innovate with new technologies, new materials and provide better information for consumers.

TOUGH GUARD™ FORTECH™

Bestway's Fortech™ airbeds represent the future of inflatable bed technology. The innovative material provides high levels of strength, durability and comfort unparalleled in the industry.

10% LIGHTER	75% MORE PUNCTURE RESISTANT	150X ABRASION RESISTANT
--------------------	------------------------------------	--------------------------------

*DISCLAIMER: COMPARED TO AN EQUIVALENT SIZE VINYL BED

STRONG MATERIAL	COMFORTABLE & CONVENIENT	BUILT TO LAST
<ul style="list-style-type: none"> PUNCTURE RESISTANT Fortech material is 75% more puncture resistant and 150 times more impervious to scratches. INCREASED IGNITION RESISTANCE Fortech material is 20% more fire retardant. STRETCH RESISTANT Properties of the Fortech material make the airbeds more resistant to stretching caused by regular inflation and repeated use by consumers. 	<ul style="list-style-type: none"> LIGHTWEIGHT MATERIAL Fortech beds are up to 15% lighter in weight compared to PVC beds of the same size. SOFT MATERIAL The Fortech material provides a soft and comfortable sleeping surface comparable to that of flocked PVC. TEMPERATURE REGULATION The features of the Fortech material ensure that beds do not become too cold or too hot when temperatures fluctuate from hot to cold, as commonly found with PVC beds. 	<ul style="list-style-type: none"> OVER-INFLATION DAMAGE Fortech beds are 70% more resistant to damage caused by over inflation. ROLLER TESTING When tested with continuous rolling of 300 lbs, Fortech beds lasted 35% longer than standard PVC beds. INTERNAL AIR LOSS After extended use during simulation testing, Fortech airbeds retain 22% more internal air pressure than PVC beds.

STRUCTURE

TRITECH™

Bestway's ultra sturdy Tritech™ is a 3-ply reinforced material. With a polyester mesh core encased in two layers of laminated PVC, this material offers superior strength and durability. By constructing the internal structure with Tritech, it ensures that the airbeds will keep their shape no matter how many times they have been inflated or deflated. Plus, the airbeds have been stress tested against the weight, strain and movement of a good night's sleep.

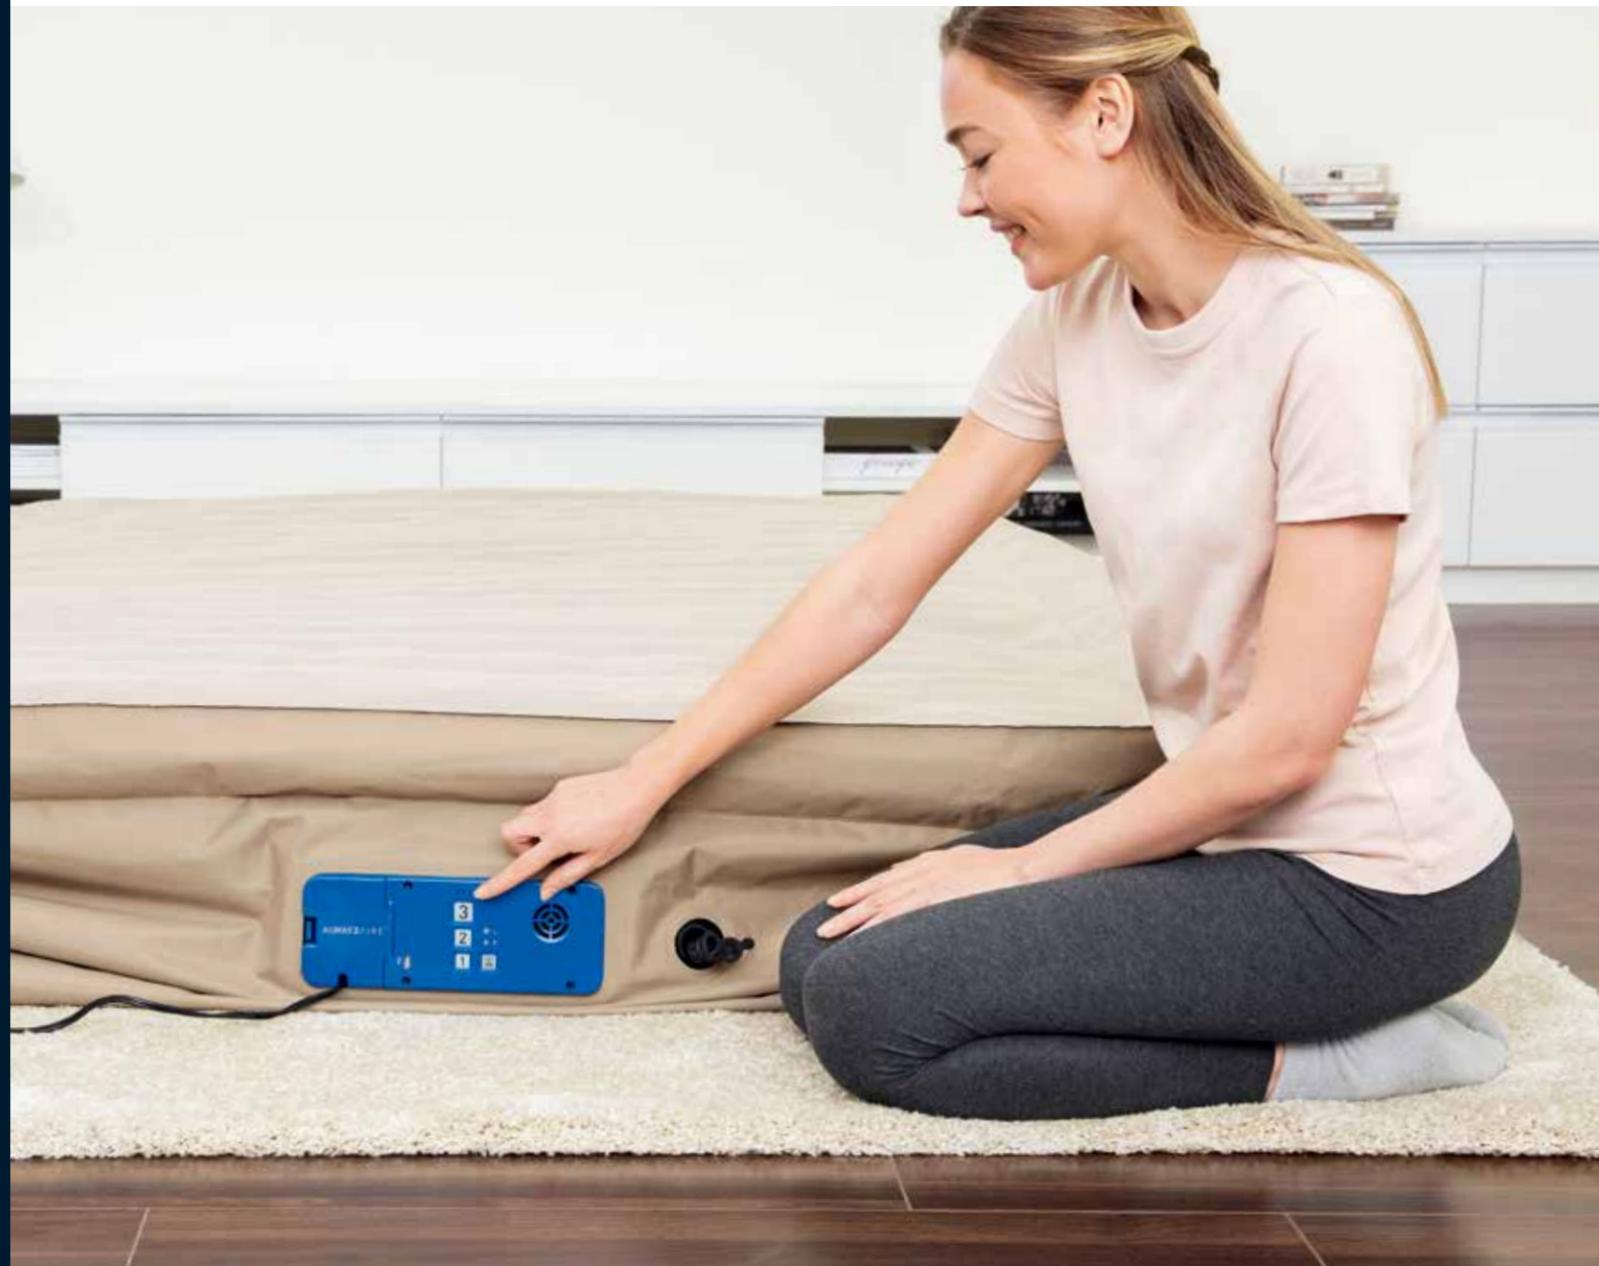

INFLATION

BAG PUMP STORAGE BAG FUNCTIONS AS PUMP

Compress the air bag for hassle-free inflation — it takes just 5 - 7 compressions to fully inflate the airbed. No pump required!

Relax & Enjoy

ALWAYZAIRE™ TECHNOLOGY

Bestway is excited to introduce AlwaysAire™ technology, the latest engineering innovation and patented technology in portable sleep solutions. Rest easy knowing your airbed with AlwaysAire technology will be fully inflated throughout the night.

ADVANCED DUAL PUMP TECHNOLOGY

▶ NO AIR LOSS, STRETCHING OR OVERINFLATION

▶ 3 COMFORT SETTINGS - SOFT, MEDIUM, & FIRM

▶ INTUITIVE ONE-TOUCH CONTROLS

Internal PSI Gauge & Motor

Can detect drops in internal pressure and will automatically start the silent re-inflation pump to get the bed back to its intended firmness setting.

Quick & Easy Deflation

The auto deflation function will allow the bed to deflate without any user hassle. The deflation pump will automatically shut off once the internal PSI reaches 0.

ALWAYZAIRE™

The dual pump system includes a pump to inflate and deflate the bed, internal sensors to detect air pressure & a silent pump that turns on to maintain the preferred comfort setting.

ALWAYZAIRE™ — 3 COMFORT SETTINGS

A dual pump system with a patented computerized PSI sensor allows consumers to automatically inflate the bed to 3 different preset comfort settings.

ALWAYZAIRE™ — REMOVABLE & RECHARGEABLE DUAL PUMP

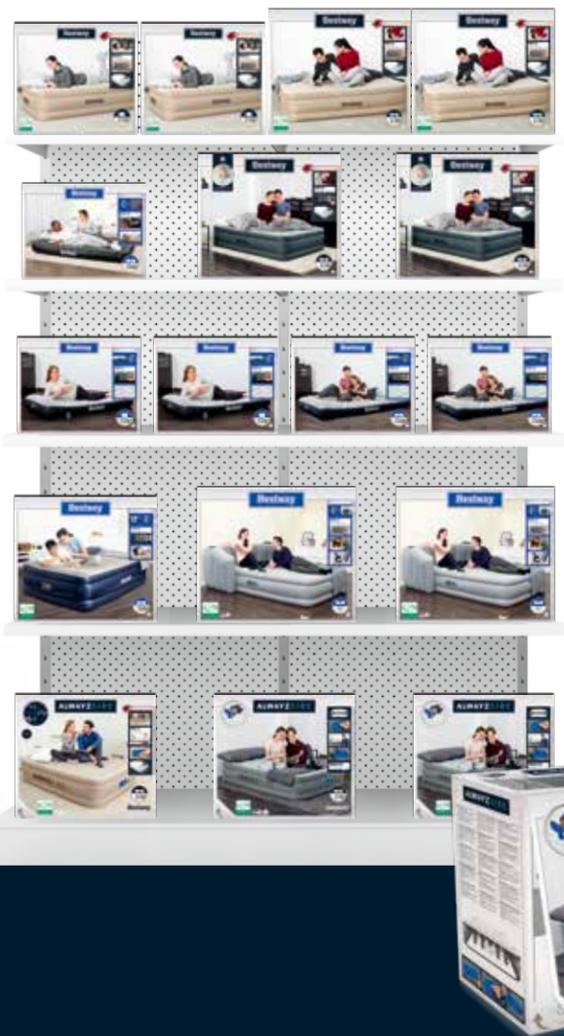

One full battery charge fully inflates the bed and maintains pressure for up to 7 nights.
